2. Ensure that water supply is clean (No Sand, Dirt, Etc.).

MAINTENANCE

All Finishes : Clean the finish with mild soap and warm water. Wipe entire surface completely dry with clean soft cloth. Many cleaners may contain chemicals, such as ammonia, chlorine, toilet cleaner etc. which could adversely affect the finish and are not recommended for cleaning

INSTALLATION

TROUBLESHOOTING

PROBLEM	CHECK POINT	SOLUTION
Unsatisfactory spray	1	Clean
Water leaks around the handle	2	Tighten
Handle is loose	3	Tighten

ATTENTION

1. Don't use abrasive cleaners or solvents on faucets and fittings.
2. Flow Regulator should not be removed because it could damage the system
3. As the product model is constantly updated, the actual product may not look the same as it shown in the diagram, but the basic installation principles are the same.
4. The hot water supply side of the faucets is in a condition of high temperature. Do not allow skin to contact with the hardware surface directly. Otherwise, scalding may occur.
